Crime in Illinois-1971 represents the third issue of this publication since the Illinois-Uniform Crime Reporting Program began. The intent of this issue is to provide interested readers with sufficient detail statistical information as it relates to the State and National aspects of criminal behavior.

Extensive tables and graphs are provided to minimize rearranging data as well as an account of crime statistical data beginning with the year 1965.

In the near future we will publish more current statistical data in terms of the Illinois Revised Statutes for every jurisdiction within the State. Currently these data are being sent to the participating law enforcement agencies, ILEC Planning Regions and the ILEC on a limited basis only. However, after the system has stabilized we will be in the position to provide you with comprehensive information on the amount and extent of criminality in our State.

Should you have any questions regarding the Program or suggestions for improvement, we would certainly welcome hearing from you.

INTRODUCTION

Background

Over the last few years the FBI has been actively assisting individual states in the development of state-wide UCR Programs compatible with the national system. These statistical programs have been given impetus by the states in the development of statewide computerized law enforcement information systems. Through such state programs more complete and better quality of reporting is made possible. Likewise, through coordination with state agencies by the FBI, the data is available for use by the state and local governments, and the collection machinery at the national agency becomes substantially streamlined and covers a greater number of agencies.

In Illinois, the establishment of a uniform crime reporting system was authorized by the 76th General Assembly, set forth by the Illinois Revised Statutes, Chapter 38, Section 206-8, quoted below:

"206-8. Crime Statistics. par. 8. The Department (The Department of Law Enforcement) shall be a central repository and custodian of crime statistics for the State and it shall have all power incident thereto to carry out the purposes of this Act, including the power to demand and receive cooperation in the submission of crime statistics from all units of government." (page 1707)

Implementation of the I-UCR Program was effective January 1, 1972.

Crime Index Federal-Uniform Crime Reports

The crime index developed by the IACP early in the UCR Program consists of Murder, Forcible Rape, Robbery, Aggravated Assault, Burglary, Larceny \$50 and Over in Value and Auto Theft. These crimes were selected because as a group, they are either serious crimes by their nature or they represent a large volume of offenses that occur.

Offenses of murder, forcible rape, robbery and aggravated assault are categorized as *violent crimes*. Offenses of burglary, larceny \$50 and over and auto theft are classed as *crimes against property*. The Crime Rate is defined as the Crime Index per 100,000 population. The crime index as defined by the Federal-UCR is illustrated below:

Violent Crimes	Murder
	Forcible Rape
	Robbery
	Aggravated Assault
Property Crimes	Crime Index
	Burglary
	Larceny \$50 and Over
	Auto Theft

The Crime Index is the total offenses in the above categories.

Sometimes readers become confused over the Crime Index and PART I Crimes. The terms PART I and PART II classes of offenses appears on the FBI-UCR data collection forms. PART I classes of offenses include the Crime Index plus manslaughter by negligence, other assaults and larceny under \$50. PART I crimes are listed below as they appear on the UCR forms;

Part I Crimes

1. Criminal Homicide
 - a. Murder and Nonnegligent Manslaughter
 - b. Manslaughter by Negligence
2. Forcible Rape
 - a. Rape by Force
 - b. Assault to Rape
3. Robbery
 - a. Armed-Any Weapon
 - b. Strong-Arm-No Weapon
4. Assault
 - a. Gun
 - b. Knife
 - c. Other Dangerous Weapons
 - d. Hands, Fists, Feet, Etc.,-Aggravated
 - e. Other Assaults-Not Aggravated
5. Burglary
 - a. Forcible Entry
 - b. Unlawful Entry-No Force
 - c. Attempted Forcible Entry
6. Larceny-Theft
 - a. \$50 and Over
 - b. Under \$50
7. Auto Theft

1.b., 4.e., and 6.b. are omitted when computing the Crime Index. Offenses known to the police are scored in accordance with the most serious crime, i.e., the way they are listed above. Offense data for these statistical classifications are reported monthly. Arrest data related to these classifications are reported annually.

Victimization

It should be understood that the statistical information presented herein represents offenses known to the police and does not reflect the actual number of crimes that occurred in the reporting period.

Many crimes occur which are not reported to the police for one reason or another. Crimes reported to prosecutors usually do not show up in the police statistics. And citizens often do not report crimes to the police.

Since better crime prevention and control programs depend upon a full and accurate knowledge of the amount of crime, the President's Commission on Law Enforcement and Administration of Justice, initiated the first national survey ever made of crime victimization. The National Opinion Research Center of the University of Chicago surveyed 10,000 households, asking whether the person questioned, or any member of his or her household had been a victim of crime during the past year, whether the crime had been reported and, if not, the reasons for not reporting. More detailed surveys were undertaken in a number of high and medium crime rate precincts of Washington, Chicago and Boston by the Bureau of Social Science Research of Washington, D.C., and the Survey Research Center of the University of Michigan. All of the surveys dealt primarily with households or individuals, although some data was obtained for certain kinds of businesses and other organizations.

These surveys show that the actual amount of crime in the United States today is several times that reported in the Federal-UCR. The amount of personal injury crime reported to the National Opinion Research Center was almost twice the UCR rate for individuals. Forcible rapes were more than 3½ times the reported rate, burglaries three times, aggravated assaults and larcenies of \$50 and over more than double, and robbery 50 percent greater than the reported rate. Only vehicle theft was lower and then by a small amount.

In view of the above, the best source for obtaining crime data is from crimes known to the police. The crimes used in the crime index (murders and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny \$50 and over and auto theft) are those considered to be the most consistently reported to police and consequently the computations of crime trends and crime rates are prepared using offenses reported to the police.

Bomb Summary

The FBI-UCR Group is currently collecting data on incidents involving explosive and incendiary devices in the Nation. According to the Bomb Summary report recently published concerning the first six months of 1972, Illinois reported 24 bombings by explosives, 20 by incendiaries, and 5 attempted using explosives and 10 by incendiaries for a total of 59. Property damage amounted to \$157,389 and personal injuries amounted to 15 with no deaths reported.

The following statistics cover incidents nation-wide for the reporting period of January — June, 1972:

Number of Bombing Incidents	1,039
Actual Bombings	814
Explosive	383
Incendiary	431
Attempted Bombings	225
Explosive	119
Incendiary	106
Number of Persons Killed	12
Number of Persons Injured	99
Value of Property Damaged	\$4,974,049
Number of Bomb Threats	11,918

Additional information is available in the Bomb Summary.

Criminal Justice Expenditures and Employment Data: 1969-70, U.S. Department of Justice, Law Enforcement Assistance Administration

Expenditure and Employment By Level of Government

Local governments continue to spend more than State and Federal Governments combined for all criminal justice activities. Table A shows that local governments accounted for 63.6 percent of all direct criminal justice expenditures (\$8,571 million), while State governments contributed 25.0 percent and the Federal Government — 11.4 percent. However, when each activity is examined separately, the proportion accounted for by the different levels of government varies through the criminal justice system.

Table A. Percent of Direct Expenditures for the Criminal Justice System by Level of Government: Fiscal Year 1969-70

Level of Government	Total	Police Protection Activities	Judicial Activities	Prosecution Activities	Indigent Defense Activities	Correctional Activities
Total	100.0	100.0	100.0	100.0	100.0	100.0
Federal	11.4	11.6	10.8	23.1	54.6	4.8
State	25.0	13.6	23.7	18.8	9.2	61.6
Local	63.6	74.9	65.5	58.1	36.2	33.5

Three of the activities, police protection, judicial activities, and prosecution, are supported mainly by the local governments which accounted for over half the total amount expended for each of the activities. Local governments expended three-fourths (74.9 percent) of the total amount spent on police protection, almost two-thirds (65.5 percent) of the total for judicial activities, and 58.1 percent of the total for prosecution.

The only activity in which the Federal Government expends more than either the state or local governments is indigent defense, (54.6 percent of the total). The remaining funds are contributed mainly by the local level of government (36.2 percent of the total).

Expenditures for the remaining activity, corrections, are concentrated at the state level whose share is 61.6 percent of the total. This large expenditure reflects the States' responsibility for the long-term confinement and rehabilitation of offenders. The Federal Government contributes very little (4.8 percent of the total) to the field of corrections while the local governments accounted for one-third of the total (33.5 percent).

Relationships similar to those found for expenditures by the different levels of government, also apply to employment figures. According to table B, more than 70 percent of the total full-time equivalent criminal justice employees of all governments (774,751 employees) are employed by local governments. However, as in the case of expenditure, the distribution of employees at each level of government varies for each activity.

Table B. Percent of Full-time Equivalent Employment in the Criminal Justice System by Level of Government: October 1970

Level of Government	Total	Police Protection Activities	Judicial Activities	Prosecution Activities	Indigent Defense Activities	Correctional Activities
Total	100.0	100.0	100.0	100.0	100.0	100.0
Federal	7.7	8.1	7.1	17.8	(X)	3.9
State	22.2	11.4	19.1	17.8	17.8	61.0
Local	70.1	80.5	73.5	64.5	82.2	35.1

X Not applicable.

In general, the level of government which spends the largest amount of the total expenditures for an activity also employs the greatest number of workers for that activity. For example, local governments accounted for over half of the total amount expended on police protection, judicial activities, and prosecution and they employed 80.5 percent, 73.5 percent, and 64.5 percent, respectively, of all employees in each of these activities. Also, since correction expenditures are concentrated at the State level, 61.0 percent of all correction employees are found at the State level government. However, indigent defense activities are an exception to this pattern, due to the use of private counsel on a fee basis. Such fees are reflected in the expenditure amounts though private counsel is not included in public employee counts. Therefore, table B shows that local governments employ 82.2 percent of all indigent defense employees.

The Federal Government

In fiscal year 1969-70 the United States government expended \$1,032 million for all criminal justice activities, an increase of \$203 million or 19.7 percent over the previous fiscal year. This amount was 0.6 percent of the 1970 Federal total general expenditure of \$167 billion.

Total full-time equivalent Federal employment in October 1970 was 2,810,125. Of this number, 59,355, or 2.1 percent, were employed in criminal justice activities. This represents an increase of 3,870, or 6.5 percent, over the previous fiscal year. Payroll amounts for these employees totaled \$68 million; up \$6.1 million, or 9.0 percent, over the previous fiscal year.

State Governments

State government total general expenditure in fiscal year 1969-70 was \$78 billion. Of this amount, \$2,268 million, or 2.9 percent, was expended on criminal justice activities. This represents an increase of \$374 million, or 16.5 percent, over the previous fiscal year.

The corrections field continues to be the area where the most money is spent (48.7 percent), followed by police protection (32.7 percent), judicial activities (12.9 percent), prosecution (3.7 percent), other related criminal justice (1.5 percent), and indigent defense activities (0.5 percent). This is explained by the fact that traditionally the State governments have had the primary responsibility for the long-term confinement and rehabilitation of offenders, but have conducted other criminal justice activities on a smaller scale.

Within the correctional field, States as a whole spent the greatest portion of their money on the operation and maintenance of their institutions. Of the \$1,104 million spent on corrections, \$795 million (72.0 percent) was for the operation of institutions. Lesser amounts were spent for capital outlay, \$121 million (11.0 percent); \$90 million (8.1 percent) for probation, parole, and pardon activities; \$38 million (3.5 percent) for administration; and \$6 million (0.6 percent) for miscellaneous correctional activities. Intergovernmental payments amounted to \$53 million, or 4.8 percent, of the total. These payments are made for activities such as the transportation and boarding of prisoners by local governments.

State expenditure for police protection activities amount to \$741 million. Of this sum, \$634 million, or 85.6 percent, went for current operation. Capital outlay expenditure amounted to \$55 million (7.4 percent), with \$52 million (7.0 percent) for intergovernmental payments.

Judicial expenditure at the State level continues to be concentrated in the operation of the major trial courts (i.e., courts of general jurisdiction, including both civil and criminal activities). In some States, the State government has financial responsibility for all major trial courts, while in other States, these courts are financed on a shared basis with the State government paying all or part of the judges' salaries and the local government financing the remainder of the operating expenses. In another type of arrangement, the State government operates the major trial courts and assesses the local governments for reimbursement. In total, the operation of these courts cost the State governments \$141 million which was 48.1 percent of the \$293 million spent on State judicial activities. The remaining State expenditure for judicial activities was as follows: Other courts, \$44 million (15.0 percent); miscellaneous, \$35 million (12.0 percent); courts of last resort, \$30 million (10.1 percent); intermediate appellate courts, \$23 million (8.0 percent); intergovernmental payments, \$10 million (3.5 percent); capital outlay, \$7 million (2.5 percent); and law libraries, \$2 million (0.8 percent).

Total full-time equivalent State employment in October 1970 was 2,301,963. Of this number, 172,241 or 7.5 percent, were employed in criminal justice activities. This

represents an increase of 6.9 percent over the previous October. Of this number, 90,334 (52.4 percent) were employed in corrections, with 55,846 (32.4 percent) in police protection, 18,464 (10.7 percent) in judicial activities, 6,780 (4.0 percent) in prosecution, 545 (0.3 percent) in indigent defense, and 272 (0.2 percent) in other related criminal justice activities.

State payrolls for criminal justice activities in October 1970, totaled \$134 million, an increase of 13.9 percent over October 1969. Corrections personnel received \$64 million (47.4 percent of the total) in salaries and wages. Police protection personnel received \$43 million (32.2 percent); judicial personnel, \$20 million (15.0 percent); prosecution personnel, \$6 million (4.8 percent); indigent defense personnel, \$663 thousand (0.5 percent); and other related personnel, \$222 thousand (0.1 percent).

Illinois State and Local Government Expenditures

The total expenditure in Illinois State and Local governments for all functions of Criminal Justice amounted to \$444,067,000 which is 5.9 percent of the national total. State level expenditures for this reporting period were \$117,067,000 and local governments were \$334,752,000 or 26.4 percent and 75.4 percent respectively. The breakdown by function at the State and Local levels of government combined amounted to \$297,422,000 or 67.0 percent of the total expenditures for police protection; \$59,063,000 or 13.3 percent for judicial; \$17,988,000 or 4.1 percent for prosecution; \$1,832,000 or 0.4 percent for indigent defense; \$67,380,000 or 15.2 percent for correctional activities and \$382,000 or 0.1 percent for other criminal justice activities.

At the State level the expenditures were \$39,356,000 or 33.4 percent of the \$117,067,000 State level criminal justice expenditures; \$20,707,000 or 17.6 percent for judicial; \$5,117,000 or 4.3 percent for prosecution; \$52,336,000 or 44.5 percent for corrections and \$167,000 or 0.1 percent for other criminal justice activities.

At the Local level the \$334,752,000 expenditure broken down functionally amounts to \$264,251,000 or 79.0 percent for police protection; \$38,367,000 or 11.5 for judicial; \$13,734,000 or 4.1 percent for prosecution; \$1,832,000 or 0.5 percent for indigent defense; \$16,353,000 or 4.9 percent for corrections, and \$215,000 or 0.1 percent for other activities.

The percent distribution of full-time employees of State and Local Governments engaged in criminal justice activities as of October 1970 was as follows:

State and level of government	Total criminal justice system		Police protection activities		Judicial activities		Prosecution activities		Indigent defense activities		Correctional activities		Other criminal justice activities	
	Number of State and local employees	Percent of all State and local employees	Number of employees	Percent of criminal justice total	Number of employees	Percent of criminal justice total	Number of employees	Percent of criminal justice total	Number of employees	Percent of criminal justice total	Number of employees	Percent of criminal justice total	Number of employees	Percent of criminal justice total

The Survey Period

The State expenditure data presented in this report cover the fiscal year ending June 30 for all States except three whose fiscal years end as follows: New York, March 31; Texas, August 31; and Alabama, September 30. However, there are some State agencies which operate on a different fiscal year basis from the rest of the State government. In such instances, figures shown are for the agency's fiscal year that ended within the State's regular fiscal year.

For local governments, the 1969-70 fiscal years reported are those which closed between July 1, 1969, and June 30, 1970. Most municipalities and counties ended their fiscal years either on December 31, 1969 or June 30, 1970. Employment date shown are for October 1970.

Data Collection

The survey was accomplished using two methods of data collection; field compilation and mail canvass. Trained field representatives compiled expenditure data for the 50 States, 128 largest counties, and 153 largest cities from the governments' own records, between July 1970 and June 1971. Employment data for these units were collected by mail. All other units in the sample were canvassed by mail (and, if necessary, by telephone) for expenditure and employment data, over a 3-month period beginning in mid-February 1971. Response for the field-compiled units was 100 percent. The response from the mail units was 80 percent.

The field survey efforts and mail canvass were supplemented by reference to a variety of published government documents such as budgets, financial statements, and audit reports. In some cases, such sources were the basis for breakdowns of totals into more detailed employment and expenditure figures.

The Budget of the United States Government for the Fiscal Year 1972, which presents actual data for fiscal year 1970, is the source of the Federal Government expenditure information in this report. Federal employment data were obtained from the U.S. Civil Service Commission.

All Federal data were recast as necessary to conform with the Census Bureau classification of governmental statistics.

Crime Factors

The factors which influence crime rates are dependent upon many characteristics of the community and, therefore, when attempting to interpret the crime statistics presented herein one should be aware of the social structure and the factors that lead to or cause criminal behaviour.

The law enforcement community can only deal with those factors under its control, whereas, other agencies must deal with the entire problem of contributing factors which lead to crime. The factors below are taken from the FBI annual report—CRIME IN THE UNITED STATES.

1. Density and size of the community population and the metropolitan area of which it is a part.
2. Composition of the population with reference particularly to age, sex and race.
3. Economic status and mores of the population.
4. Relative stability of population, including commuters, seasonal and other transient types.
5. Climate, including seasonal weather conditions.
6. Education, recreational, and religious characteristics.

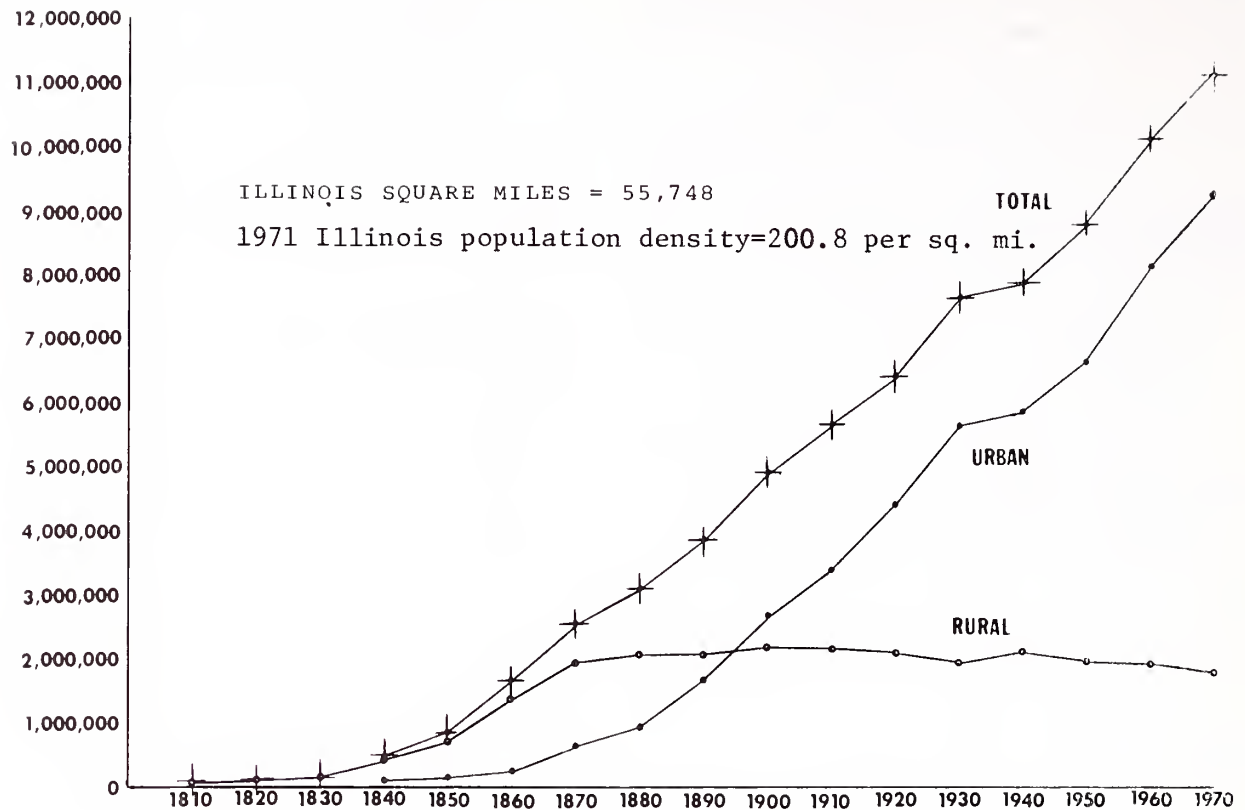

7. Effective strength of the police force.
8. Standards governing appointments to the police force.
9. Policies of the prosecuting officials and the courts.
10. Attitude of the public toward law enforcement problems.
11. The administrative and investigative efficiency of the local law enforcement agency, including the degree of adherence to crime reporting standards.

The reader should be aware of these factors when comparing one community with another to avoid coming to erroneous conclusions.

Crime In Illinois - 1971

Like the report for 1970, this report presents data submitted to the FBI-UCR during 1971, by contributing agencies. In other words data via the I-UCR for 1972 will not be available until the end of first quarter of 1973. Consequently for 1971, the annual report will have to rely on the Federal-Uniform Crime Reports.

Illinois Population Trends 1810-1970

<u>YEAR</u>	<u>URBAN</u>	<u>RURAL</u>	<u>TOTAL</u>	<u>POPULATION DENSITY PER SQUARE MILE</u>
1810		12,282	12,282	*
1820		55,211	55,211	1.0
1830		157,445	157,445	2.8
1840	9,524	466,659	476,183	8.5

Figure 1

STATE SUMMARY

STATE SUMMARY

This section of *Crime In Illinois-1971* presents crime statistical data at the State level in comparison with the United States, North Central Region, East North Central Region and contiguous states.

The North Central Region of the United States consists of; North Dakota, South Dakota, Nebraska, Kansas, Minnesota, Iowa, Missouri, Wisconsin, Illinois, Indiana, Ohio and Michigan. The East North Central Region consists of; Wisconsin, Michigan, Illinois, Indiana and Ohio. The other seven states from the West North Central Region. The North Central Region is depicted in Figure 2.

The twelve-state North Central Region represents a population segment of 57,258,000 people or approximately 28% of the U.S. population and 24.2% of the U.S. Crime Index (murder, rape, robbery, assault, burglary, larceny \$50 and over and auto theft). The five-state East North Central Region of which Illinois is part of represents a population segment of 40,721,000 people or approximately 20% of the U.S. total and 71% of the North Central Region total. The East North Central Region represents approximately 18% of the total U.S. Crime Index and 76% of the total North Central Crime Index.

Illinois has an estimated population of 11,196,000 or approximately 5% of the U.S. total, 20% of the North Central Region and 28% of the five-state East North Central Region. Illinois Index Crimes consists of approximately 5% of the U.S. total, 19% of the North Central Region and 25% of the East North Central Region.

The contiguous states consist of; Wisconsin, Iowa, Missouri, Kentucky and Indiana representing a population group of 31,829,000 including Illinois or 15% of the U.S. total. 35%

of the population resides in Illinois and represents 39% of the total Crime Index of the contiguous states.

Figure 1, depicts Illinois population trends since 1810. Note the break on urban versus rural leveled off at the 1870 U.S. Census. However, the table shows continuous urban population growth, whereas, rural population fluctuated slightly around 1940 then continues a slow trend downward which is approximately back to the 1870 level.

Table 1 provides an overview of the United States, state by state with crime index and crime rate figures for comparative analysis at the national level.

Table 2 depicts Illinois compared to the United States over the last six years. Table 3 provides a top level crime trend over the last six years for each region compared to Illinois. Table 4, focuses down one level depicting the states within the regions, showing 1970 Index Crimes, crime rates and highest in the group. Table 5 portrays crime trends comparing Illinois to the East North Central Region. Table 6, depicts the contiguous states, showing index crimes and related crime rates state by state comparisons.

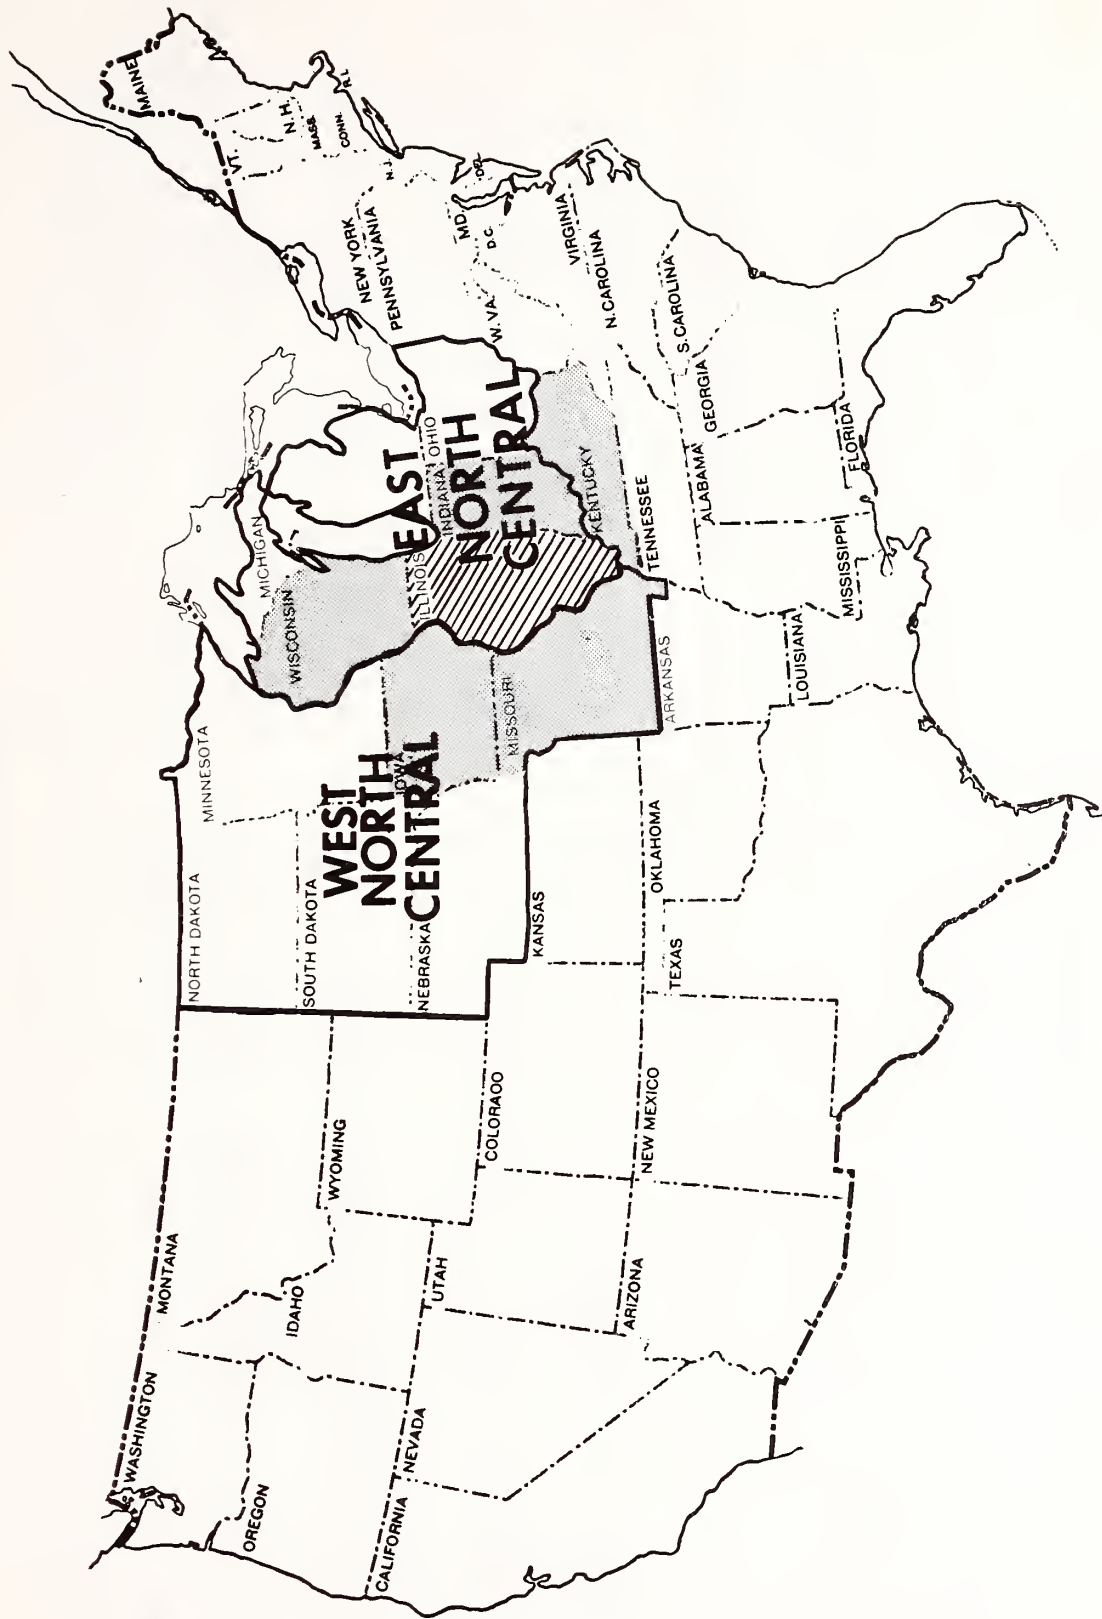

Focusing down to another level, Table 7, portrays the Crime Index for 1970, of the Standard Metropolitan Statistical Areas (SMSA) as depicted in Figure 3. Highest crime rates have been flagged out. Note that the St. Louis and Davenport-Rock Island SMSA's overlap state boundaries.

Taking the reported crime index offenses down one more level provides additional visibility. Table 8, portrays cities and towns in alphabetical order.

North Central Region

West North Central — East North Central

Contiguous States

Table 8 (continued)

CRIME TRENDS

This section of the State Summary contains a series of charts that shows index crime and crime rate trends comparing Illinois with the United States, North Central Region and East North Central Region. Detail tables have been associated with the graphs to give a composite presentation of the subject matter without having to dig through tabular data. 1965 is considered the base year, therefore, all percent changes for succeeding years are calculated using 1965 as a base. Since the charts are self-explanatory, no further discussion will be presented.

The source of all information provided in this report is from contributing agencies to the Federal-UCR system.

Crime Trend Comparison Illinois Vs. U.S.A.

Percent Change From 1965
1965-1971

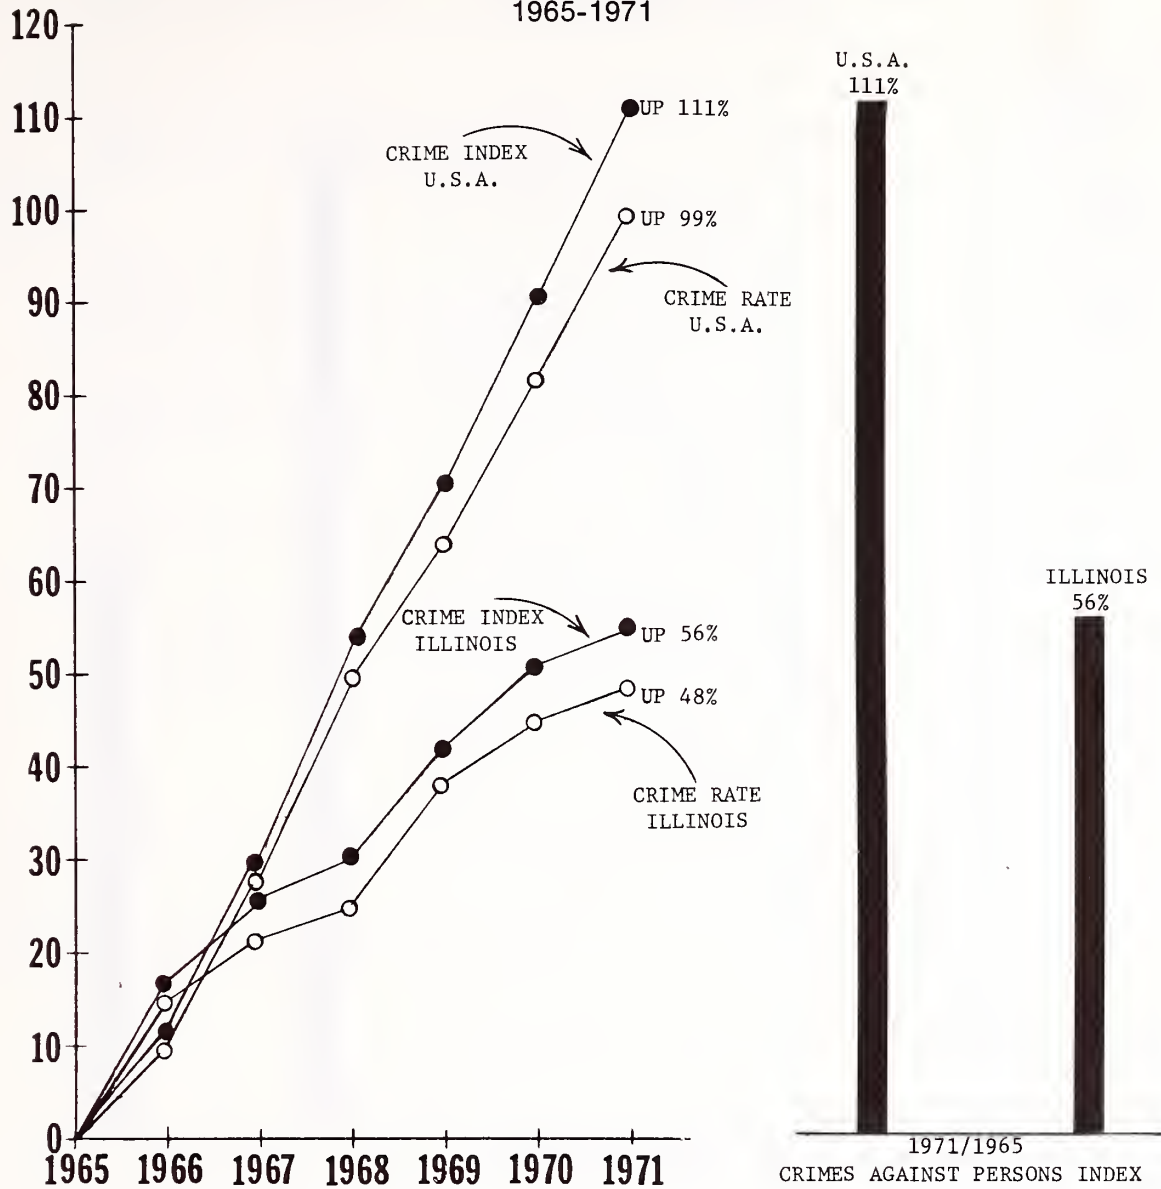

CRIME INDEX = MURDER, FORCIBLE RAPE, ROBBERY, AGGRAVATED ASSAULT,
BURGLARY, LARCENY (\$50 AND OVER), AUTO THEFT

Population for each state for 1971 is Bureau of Census provisional
estimate as of July 1.

Manslaughter by Negligence	Manslaughter by Negligence
Embezzlement	Embezzlement

ARREST INFORMATION

Law Enforcement Agencies contribute arrest information to the Federal-UCR Program annually and includes all 26 categories of crime one of which is All Other Offenses (except traffic). Since All Other category of crime ranks third relative to frequency of occurrence, (See Table 8) then an explanation of what it consists of is warranted. The All Other crime category contains all arrest information for which there isn't a crime category; for example, abduction and compelling to marry, abortion, admitting minors to improper places, assisting another in the commission of self-murder, bastardy and concealing death of a bastard, bigamy and polygamy, blackmail and extortion, bribery, combination in restraint of trade, trusts, monopolies, contempt of court, criminal anarchism, criminal syndicalism, discrimination-unfair competition, displaying red or black flag, kidnaping, marriage within prohibited degrees, miscegenation, offenses contributing to juvenile delinquency, perjury and subornation of perjury, possession, repair, manufacture, etc., of burglar's tools, possession or sale of obscene literature-pictures, public nuisance, riot and rout, etc. In other words All Other Offenses are included.

These data are collected by Age, Sex and Race within the twenty-six categories ranked by frequency of occurrence for 1965 and 1970. The purpose here is to show the relative activity in each category in descending order and the shift in arrest activity between 1965 and 1970.

For example, Narcotic Drug Law arrests shifted from position 20 in 1965 to position 9 in 1971. Disorderly conduct arrests remained as the highest activity, whereas drunkenness dropped from number 2 in 1965 to number 3 in 1970 overtaken by the volume in the Larceny-Theft and Drunkenness categories. Weapons, carrying, possession, etc. jumped from position 15 in 1965 to 11 in 1970.

To make an arrest and process the subject takes time. Taking this point of view, a sample survey by the Crime Studies Section indicated conservatively about one hour of an officer's time is involved—not considering the desk sergeant's time, records, fingerprinting, etc., for arrests on Drunkenness and Disorderly Conduct. Looking at the list of arrests in terms of manhours, note the amount of time spent on Disorderly Conduct, Drunkenness, Run-Aways and Vandalism if we assume at least one hour per arrest of an officer's time, ignoring preliminary and final investigation time.

In the Introduction it was mentioned that offense information is not collected for all 26 categories only the Part I Crimes, 7 in all. The ratio of offenses known to the police in the Part I crime category is about 3 to 1. The activity not shown in these statistics for 19 crime categories is offense information which would be sizeable if the 3 to 1 ratio held. Therefore, a complete picture of the extent of crime is not known as well as the volume of activity effecting police workload is not reflected.

The I-UCR Program has been designed to correct this situation, whereby, the volume of offenses and related arrests are measured by specific State and Local laws and have been expanded to gain visibility into the All Other category.

The following sequence of charts depicts the offense and arrest relationship and trends for the top 7 offenses. Again, tables of data are associated with graphs and shouldn't require additional explanation.

Back up tables for all categories of offenses and their respective arrest volumes follow the charts. These tables are organized by age, sex and race.

Table 24

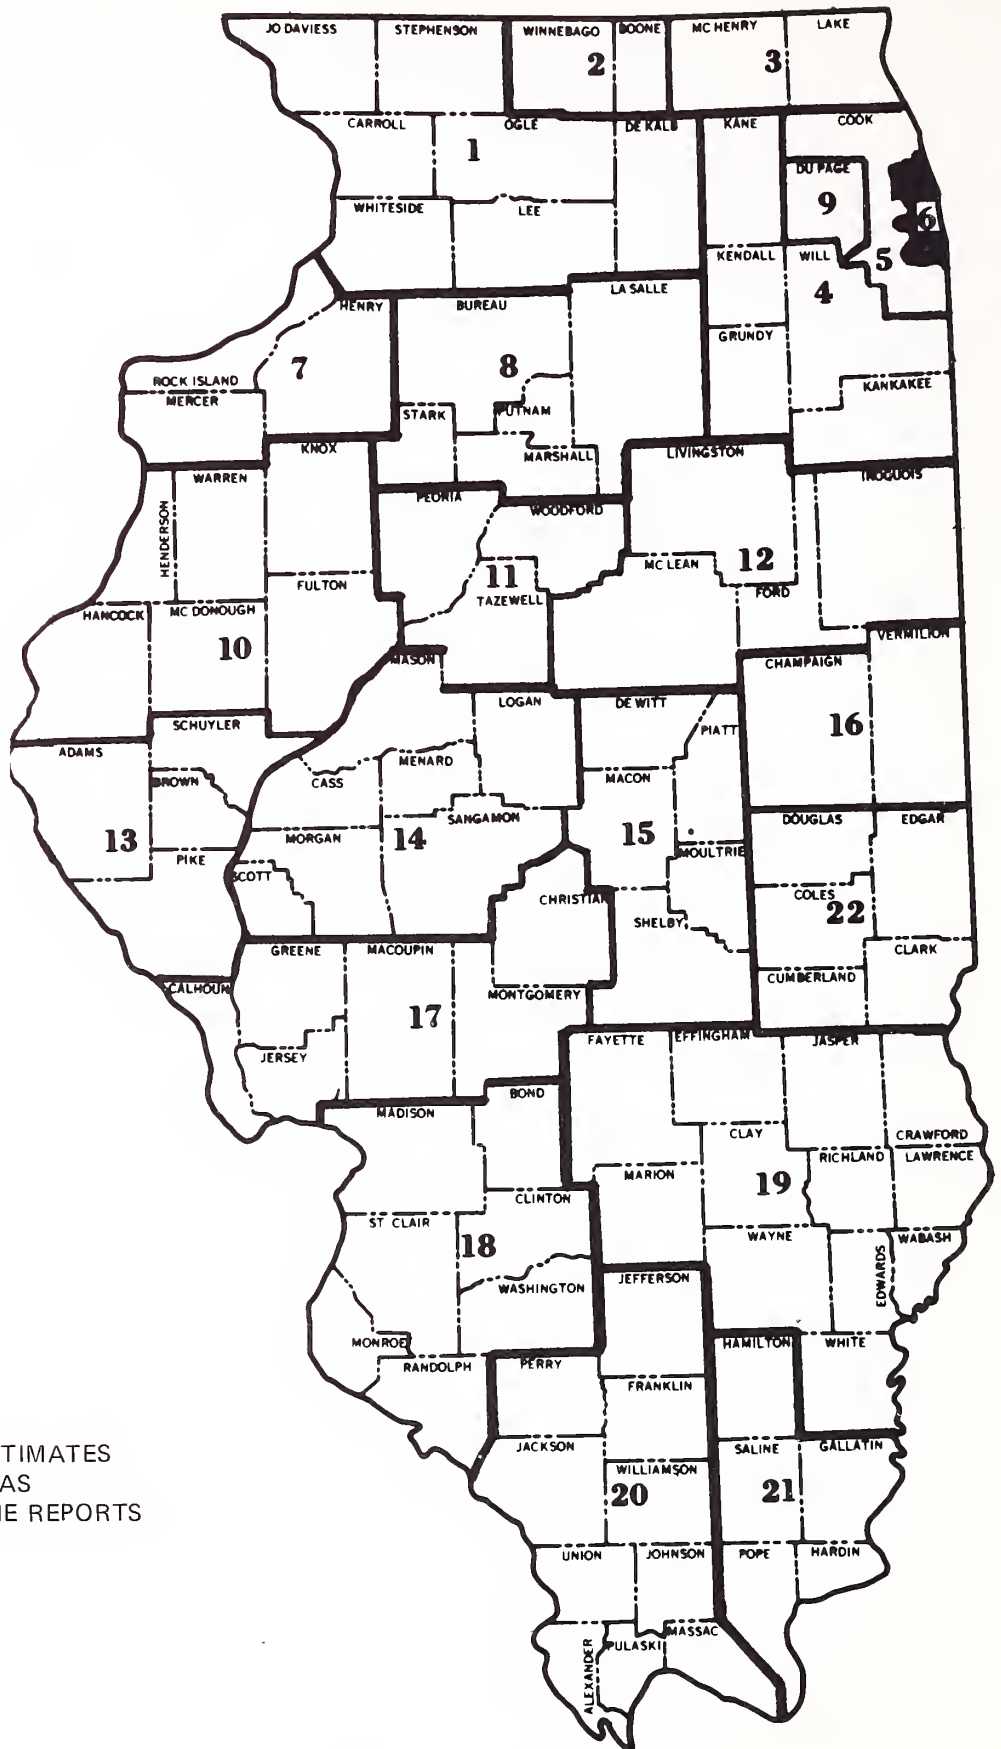

ILEC (ILLINOIS LAW ENFORCEMENT COMMISSION) REGIONAL SUMMARY & COUNTY OFFENSE DATA

The following section consists of offense data in the seven categories of Part I Crimes; namely, murder and non-negligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny over and under \$50 and auto theft. These data are detailed down to the county level showing crime index volumes and crime rates summarized from the county level to the Regional levels.

The section is divided into three parts; namely, Regional Offense Analysis, Regional Summary and Regional Groupings of Counties followed by an alphabetical listing of counties and crime index data for easy reference.

Table 28 (continued)

LAW ENFORCEMENT INFORMATION

This section contains lists of law enforcement agencies and related data regarding manpower, jurisdictional area and other data that is useful in describing the agencies. The tables are ordered by population for comparative analysis. Some of the manpower figures may be off slightly due to the transition of converting to the I-UCR. However, these data will be updated and kept current as part of the reporting procedure of the I-UCR.
